**TO WHOMSOEVER IT MAY CONCERN**

I am pleased to recommend **Bhavya Jha**, who completed a summer internship with us at **Antier Solutions Pvt. Ltd (Mohali)** During the internship, **Bhavya Jha** demonstrated a strong enthusiasm for learning and quickly adapted to our fast-paced IT environment.

She contributed effectively to one of the client's projects, where she worked on SQL, RAG, VectorDB (Qdrant), Knowledge Graphs (Neo4J), Semantic Search, Gradio, and APIs using Django. She also implemented scheduled tasks using Celery with cron jobs for automating periodic operations and containerized the application using Docker, demonstrating solid problem-solving skills and a keen eye for detail.

What stood out most was their proactive attitude and ability to collaborate with team members, which made a positive impact on our workflow. **Bhavya Jha** also showed great initiative in troubleshooting and suggesting improvements to existing processes.

I am confident that **Bhavya Jha** will bring the same dedication and passion to future endeavors. They have a promising career ahead in the IT field.

For Antier Solutions Pvt. Ltd.
